

## New KLiiK Denmark collection launched

**Author:** Luke Haynes

**Published:** 19/03/2018

Custom laminations, unique patterns, translucent colours and original finishes are some of the design elements that have been included in the new KLiiK Denmark collection. Inspired by Scandinavian design and key fashion influences, the collection is aimed at men and women with a petite fit frame.

In the men's range, the K-603 model is a bold square shape frame balanced by a thin, custom acetate made with side by side lamination technique.
