

KLiiK denmark May 2018 releases.

May 2018

KLiiK denmark launches a summer collection that cleverly combines eye-catching patterns, original finishes and unexpected pops of color with contemporary, clean shapes. Inspired by Scandinavian design and key fashion influences, the collection is designed for those requiring a narrow fit and smaller eye sizes.

Featuring a modified round shape, women's style K-617 (right) is inspired by fashion's take on graffiti art. The digitally printed pattern outlines a solid color frame. A laser cut down highlights the interesting contrast of this model that is available in four color combinations of cobalt, wine, black and brown.

Women's style K-618 (left) is a combination frame with a modified rectangular shape offered in hues of sage, cobalt, raspberry and brown. The metal inlay at the end pieces continues to the temples adding a color blocked effect.

Women's style K-620 (image on Home Page) uniquely combines three types of finishing: matte metal on the bridge, high gloss and glitter epoxy on the front and temples. To achieve the definition of the curve between the high gloss and the glitter epoxy, a cut down groove is etched for a clean finish. Available in rich color combinations of navy gold, burgundy rose, stone black and brown eggplant.

A men's rectangular frame completes the KLiiK denmark May 2018 releases: K-619 (right) features a mono-block front with two-tone coloring around the all the outside edges of the frame. This subtle pop of color is available in grey lime, brown orange and black cobalt.
