

[KLiiK denmark Fall 2018 Collection.](#)

September 2018

Rich color combinations, laser cut detailing and innovative materials are some of the elements that highlight the KLiiK denmark collection for Fall 2018. Inspired by Scandinavian design and key fashion influences, the new styles offer unique and custom design elements for men and women requiring smaller eye sizes with a minimalistic and modern aesthetic.

For the ladies, three new styles featuring exclusive patterns and colors are released this fall.

Metal frame K-625 has a modified square shape and a keyhole bridge for a vintage appeal. It features a mono-block front and a laser cut down design on the temples highlighted by two-tone coloring. This style is offered in blueberry fuchsia, black gold, brown mint and wine tangerine.

The modified cat eye shape of style K-626 (right) comes in patterned and translucent acetates. The beautiful mix of neutral tones and patterns is enriched by a subtle metal end cap on the temple. Brown medley, black spec, blush and nude are the color combinations available.

An eye-catching style in handmade acetate of gradient glitter gives a unique look to the rectangular shape in style K-629 (left). The beautiful metal décor showcased on the end pieces and the temples adds a touch of refinement to this frame that is available in hues of rose, seafoam, blush and midnight.

The three new releases for men combine thin metal profiles with subtle pops of color and laser cut detailing.

Rectangular style **K-622** (left) features a mono-block front with a laser cut linear detail at the end pieces, highlighted by two-tone coloring. This style is available in black red white, brown green cream and grey blue taupe.

In keeping in line with the linear design, style **K-627** features a cut out on the end pieces with a step down molded temple, accented with a pop of color. Charcoal red, black blue and brown forest are the color options for

this style.

Vintage inspired style **K-630** features a metal rim wrapped in genuine leather and finished with clear protective coating. The polished metal bridge, end pieces and temples complete the minimalistic look. This style is available in color combinations of brown black, grey silver and black gun.

The new **KLiik** Denmark collection is rounded out by two unisex frames.

With an ultra-thin profile, lightweight and with a retro round shape, style **K-631** (right) features real leather wrapped around the metal rim and sealed with a clear protective coating. The metal bridge and end pieces have a polished finish. A subtle laser engraved pattern is found along the temples. Available colors include brown gold, black light gun and blue dark gun.

A modern twist on the timeless aviator shape, style **K-632**.

Featuring a double metal bridge bar with a mono-block front that has a laser cut groove along the rim to be finished in contrasting color. **K-632** is available in hues of black palladium, brown black and black dark gun.
