## INSPIRED BY SCANDINAVIAN DESIGN!

Custom laminations, unique patterns, translucent colours and original finishes are some of the design elements that highlight the new KLIIK Denmark collection.

Two new styles for women that incorporate patterns with contrasting colours stand out.

The flattering subtle cat eye shape, style K-602 is an authentic design masterpiece. Featured in custom acetates where two different acetates are laminated side by side on the front and temples to give a distinct look. Each colourway has a different pattern that refines look.

Another one, K-606, a modified square shape in stainless steel, features a subtle, contemporary pad printed pattern on the lower part of the frame front, creating textured detail.
