KLiiK denmark has added three new styles for July that blend innovative constructions, attractive color combinations and original finishes. Featuring a round retro shape, metal frame K-621 shows off three eye rims that are soldered together onto a monoblock front and highlighted with contrasting double stripes. To top off the style, an epoxy lacquer is applied over the frame for an ultra-shine finish. With a modified square shape, women's style K-623 features a marble acetate front, embedded with a metal inlay at the brow line all the way to the end piece that peeks through the top edge. Completed by matching metal temples in a pearl finish, this style comes in navy silver, brown gold, black gun and burgundy rose. Another women's style K-624 combines a modified round shape with a custom lamination. Beveling along the brow line and the end pieces gives a 3D look while showing off the bottom acetate layer, revealing the colorful, translucent tortoise acetate of this frame.
